

## QGIS Application - Bug report #22107

### Create vector New shapefile POLYGON

2019-05-20 04:53 PM - salvatore fiandaca

<b>Status:</b>	Closed	
<b>Priority:</b>	High	
<b>Assignee:</b>		
<b>Category:</b>	Data Provider/OGR	
<b>Affected QGIS version:</b>	3.4.8	<b>Regression?:</b> No
<b>Operating System:</b>	win 10 64b OSGeo4W	<b>Easy fix?:</b> No
<b>Pull Request or Patch supplied:</b>	No	<b>Resolution:</b> invalid
<b>Crashes QGIS or corrupts data:</b>	No	<b>Copied to github as #:</b> 29920
<b>Description</b>		
<p>Layer → Create vector → New shapefile and create a POLYGON shapefile</p> <p>QGIS sees it as if it were MULTIPOLYGON (go to layer properties, information)</p> <p>this is a problem if an algorithm or plugin only accepts polygon geometries, in fact the CLIPPER plugin [0] only accepts polygons and therefore goes into error.</p> <p>[0] <a href="https://plugins.qgis.org/plugins/clipper/">https://plugins.qgis.org/plugins/clipper/</a></p> <p>thank you</p>		

#### History

- Resolution set to invalid
- Status changed from Open to Closed

For shapefiles there is no difference between multi and single geometries, for this reason ogr and QGIS treat them as multi.
