Description

Plugins -> GPS -> Create new GPX layer

There is a possibility to draw new lines but not to modify existing nodes.

Confirmed, the "node tool" is disabled when editing gpx layers.

Basic editing of a gpx layer is possible. You can draw new tracks and delete whole lines, but cannot move or delete vertices. If editing is possible I expect similar functionality to shapefile layers for example, hence I bumped up the priority of the ticket.

The provider currently doesn't implement the [[ChangeGeometries]] capability (just like OGR doesn't doesn't implement [[DeleteAttributes]]).
