Assignee:	nobody -		
Category:			
Affected QGIS version:		**Regression?:**	No
Operating System:	Debian	**Easy fix?:**	No
Pull Request or Patch supplied:		**Resolution:**	fixed
Crashes QGIS or corrupts data:		**Copied to github as #:**	12379

Description

When using symbology-ng with categorized fields, map composer don't correctly create legend component

History

#1 - 2009-12-23 03:48 PM - John Tull

Symbology-ng is yet to be incorporated into the print composer. This is a known issue. The workaround for printing is to use old symbology.

#2 - 2010-03-27 10:45 AM - Martin Dobias

- *Resolution set to fixed*

- *Status changed from Open to Closed*
