

Status:	Closed	
Priority:	Low	
Assignee:	nobody -	
Category:	Digitising	
Affected QGIS version:		Regression?: No
Operating System:	Windows	Easy fix?: No
Pull Request or Patch supplied:		Resolution: worksforme
Crashes QGIS or corrupts data:		Copied to github as #: 12403
Description		
1. Fresh project		
2. Add layer (attached)		
3. Open table		
4. Press start editing		
5. Select all 4 records <i>with the mouse</i> (not by pressing invert selection)		
6. Hit delete button		
QGIS tries to emove 0 records?		

History

#1 - 2010-01-03 10:50 PM - Maxim Dubinin

I'm using

Also, by selection by mouse I mean - select first record by leftclicking and move mouse down to the end. Strange, I select clicking one after another with Ctrl pressed - number of records is determined correctly.

#2 - 2010-01-04 01:10 AM - Giovanni Manghi

I'm not able to reproduce it with qgis trunk under both linux and windows xp.

#3 - 2010-01-04 08:28 AM - Maxim Dubinin

- Resolution set to worksforme
- Status changed from Open to Closed

strange, now it's gone ...
