

QGIS Application - Bug report #2346

Search query doesn't work with fields with colon

2010-01-06 09:22 AM - dr -

Status: Closed	
Priority: Low	
Assignee: nobody -	
Category: Vectors	
Affected QGIS version:	Regression?: No
Operating System: All	Easy fix?: No
Pull Request or Patch supplied:	Resolution: fixed
Crashes QGIS or corrupts data:	Copied to github as #: 12406

Description

1. If field's name contains colon (':'), then search tools doesn't work. QGIS returns error message: 'syntax error, unexpected Unknown_CHARACTER, expecting \$end'.

2. For searching attribute value containing space, eg. 'any value', Advanced search needs using quotes, but for simple searching with attribute table it is not required.

History

#1 - 2010-06-20 08:53 AM - Martin Dobias

- Resolution set to fixed

- Status changed from Open to Closed

Fixed in commit:e48766e5 (SVN r13755).
