<b>Description</b>		
<p>In QGIS 1.4.0 on Ubuntu 9.10, the new Field Calculator does not update the table view if the table is a shapefile that contains only one record. The data itself is updated correctly, though.</p> <p>Closing the table view and opening it again is a workaround, but annoying.</p>

Looks fine with 1.6 on Fedora.

##### #4 - 2010-11-12 04:18 AM - Volker Fröhlich

- Resolution set to worksforme

- Status changed from Open to Closed

Please try trunk or 1.6, when available. Reopen the ticket if the problem persists.

##### #5 - 2010-11-12 06:11 AM - dr -

looks fine with Trunk on Win XP
