<b>Description</b>	
Recently, qgis has stopped allowing one to stop editing: <ol style="list-style-type: none"><li>1. load a editable layer</li><li>2. click on the start editing button</li><li>3. click on the stop editing button</li></ol> <p>Qgis remains in editing mode for that layer. This used to work a week or so ago.</p>	

### History
