QGIS Application - Bug report #2380
Font symbol rotation for points is off center axis

2010-01-20 09:46 AM - John Tull

Status:	Closed		
Priority:	Low		
Assignee:	Martin Dobias		
Category:	Symbology		
Affected QGIS version:		**Regression?:**	No
Operating System:	OS X	**Easy fix?:**	No
Pull Request or Patch supplied:		**Resolution:**	fixed
Crashes QGIS or corrupts data:		**Copied to github as #:**	12440

Description

Font symbols in point data are not being placed or rotated on the center axes. I would expect the center intersection of the horizontal and vertical axes to serve as the point of placement and rotation, but this is not the case on my system. I've attached a screen grab of the rotation issue. Rotating further places the font symbol out of the preview window and renders no symbol for the point data. I am using qt-4.6.0.

History

#1 - 2010-01-20 02:40 PM - Martin Dobias

- Resolution set to fixed

- Status changed from Open to Closed

fixed in commit:d8be90e3 (SVN r12809)
