

QGIS Application - Feature request #2387

enable creation of spatialite vector layer from scratch

2010-01-23 03:37 AM - Stefano Costa -

Status:	Closed	
Priority:	Low	
Assignee:	Gary Sherman	
Category:	Vectors	
Pull Request or Patch supplied:		Resolution: fixed
Easy fix?:	No	Copied to github as #: 12447
Description		
<p>Currently, if I need to create a vector layer from scratch using QGIS, I can only create a Shapefile. Given the extended support for [[Spatialite]] in QGIS, and the large set of advantages that it brings compared to Shapefile, this is a request to add [[Spatialite]] layer creation to QGIS.</p> <p>Obviously, creating a Shapefile and converting it to [[Spatialite]] using some kind of command line magic is not an option for the average user.</p>
