QGIS Application - Feature request #2432
authentication method 7 not supported

2010-02-11 08:05 AM - pungami -

Status:	Closed		
Priority:	Low		
Assignee:	nobody -		
Category:	Data Provider		
Pull Request or Patch supplied:		**Resolution:**	invalid
Easy fix?:	No	**Copied to github as #:**	12492

Description

Cannot connect (add new [[PostGIS]] layer) to gss-api configured ("single-sign-on") [[PostgreSQL]] server.
"Connection failed - Check settings and try again.
Extended error information: authentication method 7 not supported"

Connection is successful using 'psql' on the same pc.

Connection is successful on a Linux box using Qgis 1.3 to the same [[PostgreSQL]] server.

History

#1 - 2010-02-12 02:18 AM - pungami -

libpq.dll (and libeay32.dll and ssleay32.dll) can be replaced with newer version as a workaround - works for me (qgis 1.5 together with the replaced dll-s from [[PostgreSQL]] 8.3 win install)!

#2 - 2010-09-16 11:18 PM - luca76 -

- Resolution set to invalid

- Status changed from Open to Closed

I think that this is not QGIS fault.

So I'm closing this bug.
