

QGIS Application - Feature request #2442

Enhanced constraint violation error dialog while saving edits

2010-02-12 11:13 AM - Sfkeller -

Status:	Open	Resolution:  Copied to github as #: 12502
Priority:	Low	
Assignee:		
Category:	Data Provider	
Pull Request or Patch supplied:	No	
Easy fix?:	No	
Description		
<p>Let's assume that before hand some constraints in the database - say not null, uniqueness, etc. - or even topology rules have been entered. Then the user captures some features with their geometry and a probably incomplete attribute values.</p> <p>When leaving edit mode (or just issueing a validataion check-dialog) a modal dialog currently says that a number of constraints have been violated. There's currently no chance to find out which features could be the cause.</p> <p>Thus an enhanced modal dialog is proposed with a list of errors: every line indicates the feature id and a constraint violation text. When clicking on a line in the the dialog, the respective feature is highlighted and one can change to edit mode efficiently.</p>
