

QGIS Application - Bug report #2445

Problems with table manager and postgis tables

2010-02-16 02:06 AM - bjpfei -

Status: Closed	
Priority: Low	
Assignee: Borys Jurgiel	
Category: Python plugins	
Affected QGIS version:	Regression?: No
Operating System: All	Easy fix?: No
Pull Request or Patch supplied:	Resolution: fixed
Crashes QGIS or corrupts data:	Copied to github as #: 12505

Description

It seems that the table manager doesn't work with postgis tables that don't have the geometry column as last column.

- 1.) Try a shapefile => Table Manger works
- 2.) Try a postgis Table with geometry column as last column => Table manager works
- 3.) try a postgis table with geometry column not as last column => you get an python error

Traceback (most recent call last):

```
File "/home/bjsvwpfe/.qgis/python/plugins/tablemanager/tableManager_plugin.py", line 63, in run
  dialoga = tableManager_gui.TableManager(self.iface)
```

```
File "/home/bjsvwpfe/.qgis/python/plugins/tablemanager/tableManager_gui.py", line 173, in +init+
  self.drawFieldsTable()
```

```
File "/home/bjsvwpfe/.qgis/python/plugins/tablemanager/tableManager_gui.py", line 183, in drawFieldsTable
  item = QTableWidgetItem(fields[i].name())
```

```
[[KeyError]]: 82
```

thx

meanwhile you can use the "postgis manager" plugin.

#2 - 2010-02-16 02:47 AM - bjpfei -

me yes but not our users.

It's not that good if they edit the tables directly on the database ;-)

#3 - 2010-06-12 02:12 AM - Paolo Cavallini

Why not? If they got permission to do it, they're assumed safe

#4 - 2010-06-17 01:01 PM - Borys Jurgiel

- *Resolution set to fixed*
- *Status changed from Open to Closed*

fixed in v 0.1.11
