

QGIS Application - Bug report #2467

Problems creating shapefiles

2010-02-24 05:52 PM - yermahn -

<b>Status:</b>	Closed	
<b>Priority:</b>	Low	
<b>Assignee:</b>	nobody -	
<b>Category:</b>	Data Provider	
<b>Affected QGIS version:</b>		<b>Regression?:</b> No
<b>Operating System:</b>	OS X	<b>Easy fix?:</b> No
<b>Pull Request or Patch supplied:</b>		<b>Resolution:</b> invalid
<b>Crashes QGIS or corrupts data:</b>		<b>Copied to github as #:</b> 12527
<b>Description</b>		
<p>Any time I do something that should create a shapefile, I get the three "inner files" (.qpj, .prj and .dbf), but there's no .shp to be found.</p> <p>I am very new to this process, so maybe I am doing something wrong or misunderstanding the process, but I have worked on this for so long now, and I think something must be wrong. Please note that I have 2 macs, both running OS 10.6. They each have the same, most recent version of Qgis, and they each have the same problems.</p> <p>Thanks,</p> <p>Shawn</p>

can you please give it a try with a non obsolete version, like 1.4 and then report back? thanks

#2 - 2010-03-05 12:24 PM - yermahn -

Hi,

Sorry, I apparently mis-entered the information above. I am using 1.4.

Thanks,

Shawn

How are you creating shapefiles? please describe the steps.

#4 - 2010-03-20 05:56 AM - Giovanni Manghi

- Resolution set to invalid

- Status changed from Open to Closed

Closing for lack of feedback. Reopen if necessary with more details.
