

QGIS Application - Feature request #2469
advancedDigitizeToolBar is not visible for plugin development

2010-02-25 05:46 AM - skiefer -

Status:	Closed	
Priority:	Low	
Assignee:	Gary Sherman	
Category:	Python plugins	
Pull Request or Patch supplied:		Resolution: fixed
Easy fix?:	No	Copied to github as #: 12529
Description		
<p>There is no function in the main qgis interface to retrieve the advanced digitize toolbar from a plugin (in my case while developing in python).</p> <p>In fact i identified that there is no member exposing this toolbar.</p> <p>I am not a c++ developer, but I believe the following places (at least) must be changed, respectively other places. Whatsoever, it worked for me with this changes:</p> <p>qgisinterface.h:</p> <p>after line 190:</p> <pre>virtual QToolBar *advancedDigitizeToolBar() = 0;</pre> <p>qgisappinterface.cpp:</p> <p>after line 233:</p> <pre>QToolBar *QgisAppInterface::advancedDigitizeToolBar() { return qgis->advancedDigitizeToolBar(); }</pre> <p>qgisinterface.sip:</p> <p>after line 144:</p> <pre>virtual QToolBar *advancedDigitizeToolBar() = 0;</pre>
