

QGIS Application - Bug report #2488

Unable to add filter to PostGIS layer while "Render" option is turned off

2010-03-03 05:43 PM - bstempi -

Status: Closed	
Priority: Low	
Assignee: nobody -

Affected QGIS version:	Regression?: No
Operating System: All	Easy fix?: No
Pull Request or Patch supplied:	Resolution: worksforme
Crashes QGIS or corrupts data:	Copied to github as #: 12548

Description

I found that I was not able to add filters on [[PostGIS]] layers while the "Render" option in the lower right hand corner is unchecked. The idea was to add a layer, stop the rendering, add a filter on my layer, and **then** to render (to save bandwidth).

After unchecking "Render," I right-clicked on the layer, and went to Properties-> General-> Query Builder. I received a database error for every WHERE clause I wrote. After clicking "cancel," I checked the "Render" option, navigated back into the Query Builder, and was able to use WHERE clauses that previously failed.

History

#1 - 2010-03-08 01:50 PM - Jürgen Fischer

not reproducible here.

#2 - 2010-03-11 04:00 PM - bstempi -

I'll attempt to replicate on another system as soon as possible.

#3 - 2010-06-14 04:10 AM - Giovanni Manghi

please leave further feedback or close if not replicable

#4 - 2011-03-03 02:24 PM - Volker Fröhlich

- Resolution set to worksforme

- Status changed from Open to Closed

Please re-open if problem is still there.
