QGIS Application - Bug report #2540
Join by attributes throws an error if a table contains fields with cyrrilics

2010-03-10 08:34 AM - Maxim Dubinin

Status:	Closed		
Priority:	Low		
Assignee:	cfarmer -		
Category:	Python plugins		
Affected QGIS version:		**Regression?:**	No
Operating System:	All	**Easy fix?:**	No
Pull Request or Patch supplied:		**Resolution:**	worksforme
Crashes QGIS or corrupts data:		**Copied to github as #:**	12600

Description

Though I understand this is not smart for the person to create such fields, field names in language other than English are typical and better be handled.

See attachment for testing.

Error:

At выполнении Python-кода возникла ошибка:

Traceback (most recent call last):

    self.joinField.addItem(unicode(i))
[[UnicodeDecodeError]]: 'ascii' codec can't decode byte 0x8f in position 0: ordinal not in range(128)

History

#1 - 2010-03-14 01:42 PM - Giovanni Manghi

while working today I spotted this python error when clicking on the "join by attributes" tool.

Traceback (most recent call last):
  File
"/usr/share/qgis/python/plugins/fTools/tools/doJoinAttributes.py", line
77, in jupdate
    self.jonField.clear()
[[AttributeError]]: 'Dialog' object has no attribute 'jonField'

Python version:
2.6.4 (commit:a676f188 (SVN r265):75706, Dec 7 2009, 19:02:09)
[GCC 4.4.1]

nevertheless the error wasn't critical as it was possible to close the window and use normally the tool. I had a number of vectors in the project at the time the error appeared.

Clicking the tool in an empty project or with other data in it didn't worked to reproduce the error.
