Pull Request or Patch supplied:	Resolution: fixed
Easy fix?: No	Copied to github as #: 12617
Description	
<p>Wondering why there is no default keyboard shortcut set for toggling fullscreen mode, I discovered a small typo:</p> <pre>src/app/qgisapp.cpp: 1019 shortcuts->registerAction(mActionToggleFullScreen, tr("Ctrl-F", "Toggle fullscreen mode"));</pre> <p>That should be "Ctrl+F" instead of "Ctrl-F". Or rather "F11", as Ctrl-F usually means "find". See: http://developer.kde.org/documentation/standards/kde/style/keys/shortcuts.html</p> <p>I can easily work around by setting my own shortcut of course. This only affects the default setting.</p>	

History

#1 - 2010-06-11 01:42 PM - Paolo Cavallini

Seems an innocuous patch - can anybody check and apply it?

#2 - 2010-06-12 01:10 AM - Paolo Cavallini

- Resolution set to fixed

- Status changed from Open to Closed

Fixed in commit:65b1cc24 (SVN r13710). Thanks
