

QGIS Application - Bug report #2558

JPEG2000 images display as black under Windows (QGIS 1.4.0)

2010-03-16 01:25 AM - Brendon Wolff-Piggott -

Status: Closed	
Priority: Low	
Assignee: ersts -	
Category: Rasters	
Affected QGIS version:	Regression?: No
Operating System: Windows	Easy fix?: No
Pull Request or Patch supplied:	Resolution: invalid
Crashes QGIS or corrupts data:	Copied to github as #: 12618
Description	
<p>On Win XP (SP3), QGIS 1.4.0, installed using the OSGEO4W installer, JPEG2000 files display as uniform black.</p> <p>I am not a programmer so I cannot build and test in more detail. The files made available for testing under #996 should be used for testing. I will try to look at this on a Linux box, but I am short of time.</p> <p>This problem looks like it may be similar to #996 (closed), where similar JPEG2000 problem was picked up on the Mac. I did not follow the solution quite, it seemed to be something to do with compilation options for GDAL.</p> <p>Please help me to stay off of [[ArcGIS]]! :-)</p>	

History

#1 - 2010-03-16 01:58 AM - Giovanni Manghi

I cannot find any image to test in the #996 ticket.

The images here

<http://www.microimages.com/gallery/jp2/>

open fine under linux.

#2 - 2010-03-16 03:31 AM - Brendon Wolff-Piggott -

I displayed three small images downloaded from the website in QGIS 1.4.0 under windows (CB_TM432, world, potholes2). There are clear problems with the display.

I see no way to add attachments. Will try to load to Bitbucket and link.

Please check it again with a newer QGIS, and close this if fixed
