Description

After downloading OSM data, when trying to move a feature I get:

An error has occurred while executing Python code:

Traceback (most recent call last):

[[OperationalError]]: SQL logic error or missing database

Python version:

2.5.2 (r252:60911, Feb 21 2008, 13:11:45) [MSC v.1310 32 bit (Intel)]

I'm getting this under qgis trunk under windows Seven, but I have spotted it also under Ubuntu 9.10 (qgis trunk).

The new OpenStreetMap support coming in 2.0 does not allow editing and uploading of OSM data. The current plugin with editing support has been removed.
