QGIS Application - Bug report #2624
"WMS add layers from server" Window became disabled after add a layer-wms

2010-04-03 02:24 PM - aperi2007 -

Status:	Closed			
Priority:	Low			
Assignee:	Jürgen Fischer			
Category:	Web Services clients/WMS			
Affected QGIS version:		**Regression?:**	No	
Operating System:	Windows	**Easy fix?:**	No	
Pull Request or Patch supplied:		**Resolution:**	fixed	
Crashes QGIS or corrupts data:		**Copied to github as #:**	12684	

Description

After add a layer-wms to canvas,
the single layer of wms connection listed in the wms windows became disabled and is impossble to add a second wms-layer selecting different layers.
The only workaround is close the wms-add-layer-from-server windows, then re-open, re-connect to wms-server to have again the layers selectables.

> *seems to work fine here. can you provide more detail? which version are you using?*

I'm using the with windows7.

I have more details:
the disabled happened when I change the coordinate reference system.

I change to use EPSG:3003, and after change the layers of wms server are disabled and cannot possible add or change some of them.

#3 - 2010-04-03 02:50 PM - Jürgen Fischer

- Resolution set to fixed

- Status changed from Open to Closed

fixed in commit:96fd29b9 (SVN r13235).
