QGIS Application - Bug report #2656
WMS layers sometimes do not display when render cache mode is active

2010-04-15 12:35 AM - Andreas Neumann

Status:	Closed			
Priority:	Low			
Assignee:				
Category:	Map Canvas			
Affected QGIS version:	master	**Regression?:**	No	
Operating System:	Debian	**Easy fix?:**	No	
Pull Request or Patch supplied:	No	**Resolution:**	worksforme	
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	12716	

Description

WMS layers often/somtetimes do not display when render cache is enabled and there are several vector layers (Postgis in my case) rendered on top of the WMS.

Display works reliable if render cache is disabled.

The problem seems to get worse if more vector layers (or layers in general) are involved.

History

Still true? Can you provide steps to replicate it?

#2 - 2011-12-16 01:56 PM - Giovanni Manghi

- Target version changed from Version 1.7.0 to Version 1.7.4

#3 - 2012-01-11 02:44 PM - Jürgen Fischer

- Affected QGIS version set to master
- Assignee deleted (nobody -)
- Status changed from Open to Feedback
- Pull Request or Patch supplied set to No
- Crashes QGIS or corrupts data set to No

#4 - 2012-01-28 03:11 PM - Giovanni Manghi

- Resolution set to worksforme
- Status changed from Feedback to Closed

Closing for lack of feedback. Reopen if necessary.
