

QGIS Application - Bug report #2667

QGIS UI: The icons of a layer/object property window are movable

2010-04-21 08:53 AM - Nikos Ves

Status:	Closed	
Priority:	Low	
Assignee:	nobody -	
Category:	GUI	
Affected QGIS version:		Regression?: No
Operating System:	Debian	Easy fix?: No
Pull Request or Patch supplied:		Resolution: duplicate
Crashes QGIS or corrupts data:		Copied to github as #: 12727
Description		
<p>If you open the properties window of an object (layer, CRS anything) the icons at the right are movable.</p> <p>While it might be a feature, you can place the icons too far right or left, in a place that is not any viewable or clickable thus effectively disabling the sub-feature.</p> <p>Also the icons' coordinates are saved with-in the qgis, and are not reseting if you restart the application</p>
