

# QGIS Application - Feature request #2712

## API enhancement: zoomScale(double scale) on mapCanvas

2010-05-13 11:57 AM - Anita Graser

<b>Status:</b> Closed	
<b>Priority:</b> Low	
<b>Assignee:</b> Charles Timko -	
<b>Category:</b> Map Canvas	
<b>Pull Request or Patch supplied:</b>	<b>Resolution:</b> fixed
<b>Easy fix?:</b> No	<b>Copied to github as #:</b> 12772
<b>Description</b>	
<p>It would be nice to have a function that accepts a scale value and actually affects the scale of the map, so it can be used from inside a python plugin.</p> <p>iface.mapCanvas().mapRenderer().setScale(double scale) only affects the value in the scale box in the bottom right corner of QGIS window.</p> <p>Related forum thread: <a href="http://forum.qgis.org/viewtopic.php?f=5&amp;#38;t=6572">http://forum.qgis.org/viewtopic.php?f=5&amp;#38;t=6572</a></p>

I am leaving the closing of this ticket to someone of higher rank :-D

**#3 - 2010-05-14 02:48 PM - Charles Timko -**

- Resolution set to fixed

- Status changed from In Progress to Closed

Ignore patch.txt, because after I was able to fully test it I realized I left something out so it wasn't exposed yet. bug2717fix.diff has been tested and zoomScale is exposed and does work within Python. ((And since i know this patch works I am resolving this bug))

**#4 - 2010-05-17 09:36 AM - Jürgen Fischer**

applied in commit:e88a80af (SVN r13518). Thanks.
