

QGIS Application - Feature request #2721

Smaller properties window for better display

2010-05-15 08:27 AM - Jean-Roc Morreale

Status:	Closed	
Priority:	Low	
Assignee:	nobody -	
Category:	GUI	
Pull Request or Patch supplied:		Resolution: fixed
Easy fix?:	No	Copied to github as #: 12781
Description		
<p>The properties windows of a layer is using a lot vertical space to display the different categories making necessary to scroll down. On a 17" screen, the diagram overlay is hidden at the bottom even when maximizing the window to the borders of the screen, making it hard to discover for unexperienced users. I saw a try on an small 10" netbook and the result wasn't pleasant.</p> <p>The same reasoning that happened on the composer window should be applied there too. The solution could be similar, the categories could be displayed in a text list instead of the actual big icons.</p> <p>See #2202 for an example of awkward display caused by the icons list</p>
