QGIS Application - Bug report #2726
Mapserver plugin does not export 'labelitem' property for layer with labels

2010-05-17 01:25 PM - Richard Duivenvoorde

Status:	Closed		
Priority:	Low

Crashes QGIS or corrupts data:		**Copied to github as #:**	12786

Description

Using the mapserver export plugin, a layer which has labels does not find a 'LABELITEM' line in it's mapfile anymore. This worked in older versions, but is apparently broken in current version.

It looks like it has something to do with a change in the project-file format.

Currently a 'maplayer'-element has 3 'label'-elements, the plugin code is broken because of this.

History

#1 - 2010-05-17 01:31 PM - Richard Duivenvoorde

can somebody do a simple review?

I think I can do the checkin myself.

#2 - 2010-06-11 09:11 PM - Paolo Cavallini

Is this fixed?

#3 - 2010-06-12 01:27 AM - Richard Duivenvoorde

- *Resolution set to fixed*
- *Status changed from Open to Closed*

yep, fixed in commit:ac2526b1 (SVN r13709)
