I've seen this on every platform I've tested on, linux, osx, and window XP/7, so changing the platform to ALL.

Seems critical to fix this before release, or make the plugin able to be updated somehow?

#3 - 2011-12-16 01:56 PM - Giovanni Manghi

- *Target version changed from Version 1.7.0 to Version 1.7.4*

#4 - 2012-03-27 02:06 PM - Mike Evans

- *Crashes QGIS or corrupts data set to No*
- *Affected QGIS version set to master*

Seems worse with 1.7.4, at least I can do some editing with 1.7.1. Both from Fedora rpms.

The new OpenStreetMap support coming in 2.0 does not allow editing and uploading of OSM data. The current plugin with editing support has been removed.
