QGIS Application - Feature request #2824
label color lost when canceling

2010-06-18 04:51 AM - fhof -

Status:	Closed		
Priority:	Low		
Assignee:	nobody -		
Category:	GUI		
Pull Request or Patch supplied:		**Resolution:**	fixed
Easy fix?:	No	**Copied to github as #:**	12884

Description

   - Let's have a vector layer, say containing surfaces.
   - Go to the layer properties, tab "Label" (2nd one).
   - Check "Display the labels", assign a field, and define a font color (for ex. dark blue).
   - Click on the "Color" button again, then click "Cancel".
   - Click on the "Color" button again, the color is back to black
   - The font color is also lost when clicking "Cancel" in the font definition window. The reset of the color also happens when the color has already been applied and saved.

I would be grateful if someone can test or compile for me the correction's proposal for this bug and also for #2784. Thanks.
