

QGIS Application - Bug report #283

Polygon & multipolygon shape file crashes qgis

2006-09-22 12:03 AM - creeping -

Status: Closed	
Priority: Low	
Assignee: Gary Sherman	
Category: Vectors	
Affected QGIS version:	Regression?: No
Operating System: Windows	Easy fix?: No
Pull Request or Patch supplied:	Resolution: worksforme
Crashes QGIS or corrupts data:	Copied to github as #: 10342
Description	
win32 preview 2 crashes when shape vector file is loaded. See attached file.	

History

#1 - 2006-09-22 12:15 AM - creeping -

file is located here: <http://creeping.orcon.net.nz/qgis/ldt.7z>

#2 - 2006-09-22 01:12 AM - Marco Hugentobler

This seems to be a problem of the windows version. I tried it with the current svn version on Linux and I could load and view this shapefile without any problems.

#3 - 2006-10-12 04:55 AM - Redmine Admin

Works for me in 0.8.0 Preview2 (Windows) on Windows XP Professional SP2. Try to create qgis.bat file for executing qgis

Content of qgis.bat

```
c:\path\to\your\qgis.exe  
PAUSE
```

It should prevent you from closing window with debug info which may help to diagnose the problem with crashing.

- Resolution set to worksforme
- Status changed from Open to Closed

Works for me in QGIS 0.8.0Preview 2 and also in latest Tim's Windows testbuild and also in all my Linux builds.

- Status changed from Closed to Feedback

- Resolution deleted (worksforme)

Hi this still crashes on my winxp sp2 machine :(I haven't got a debug build so I can;t give anymore information. Maybe the next windows release should have debug info.

#6 - 2006-11-21 12:42 PM - Martin Dobias

Hi, here you can get also testing debug version of qgis:

<http://qgis.org/uploadfiles/testbuilds/>

Please try again and give us some feedback.

- Resolution set to worksforme

Two weeks no feedback, I'm closing this one.

#8 - 2006-12-10 03:35 PM - creeping -

Thanks, I have tested in Tims latest win32 build and the file does not crash qgis anymore :)

#9 - 2009-08-22 12:46 AM - Anonymous

Milestone Version 0.8 deleted
