Description

When using an attribute column to scale symbol sizes according to their attribute value, there should be an option to sort the symbols so that the largest are at the bottom. Otherwise smaller symbols might be covered by others and thus made invisible.

- Target version changed from Version 2.0.0 to Future Release - Nice to have

#4 - 2017-03-23 02:10 AM - mlennert -

- Resolution set to fixed/implemented

- Pull Request or Patch supplied set to No

- Assignee deleted (nobody -)

This is now possible via the "Control feature rendering order" parameter, so closing.

Thanks !
