

QGIS Application - Feature request #2838  
allow add existing layers to existing SL dbs

2010-06-26 12:06 PM - Giovanni Manghi

Status:	Closed	
Priority:	Low	
Assignee:	nobody -	
Category:	Data Provider	
Pull Request or Patch supplied:		Resolution: invalid
Easy fix?:	No	Copied to github as #: 12898
Description		
I would like to ask if it would be possible to add a feature to allow create spatialite dbs from scratch and add existing layers to already existing dbs. Actually it is just possible to open existing ones and create new layers into existing dbs.		

History

#1 - 2010-06-26 12:14 PM - Jürgen Fischer

creating empty spatialite database is already possible.

#2 - 2010-06-26 12:18 PM - Giovanni Manghi

Replying to [comment:1 jef]:

*creating empty spatialite database is already possible.*

sorry for missing that, but... how?

#3 - 2010-06-26 12:25 PM - Jürgen Fischer

Create a spatialite layer, click the '...' button next to the database combobox and select the name of the new database.

#4 - 2010-06-26 12:45 PM - Giovanni Manghi

- Resolution set to invalid

- Status changed from Open to Closed

*Create a spatialite layer, click the '...' button next to the database combobox and select the name of the new database.*

ok, that was under my nose...

The add "add existing layers to existing SL dbs" should be covered by the "spatialte manager" plugin that is under development.

In any case I leave here a suggestion: allow creating SL db out of the "Create a spatialite layer" dialog. Hopefully sooner or later we will have the feature to allow add rasters to the SL db, so creating an empty db trough the "create a spatialite (vector) layer" will not be really straightforward.

cheers
