

QGIS Application - Bug report #2854

Exit-call in libqgis\_core

2010-07-01 02:00 AM - Volker Fröhlich

<b>Status:</b>	Closed	
<b>Priority:</b>	Low	
<b>Assignee:</b>		
<b>Category:</b>	Build/Install	
<b>Affected QGIS version:</b>	master	<b>Regression?:</b> No
<b>Operating System:</b>	Linux	<b>Easy fix?:</b> No
<b>Pull Request or Patch supplied:</b>	No	<b>Resolution:</b> wontfix
<b>Crashes QGIS or corrupts data:</b>	No	<b>Copied to github as #:</b> 12914
<b>Description</b>		
<p>rpmlint, a program for checking problems in rpm packages tells me the following:</p> <p><i>shared-lib-calls-exit /usr/lib64/libqgis_core.so.1.5.0 exit@GLIBC_2.2.5</i></p> <p>I suppose, a shared library should not call exit.</p> <p>I already saw this warning in version 1.4.0.</p>		

History

#1 - 2010-07-01 02:10 AM - Jürgen Fischer

- Resolution set to wontfix
- Status changed from Open to Closed

flex or bison does this.

#2 - 2012-06-29 07:08 AM - Volker Fröhlich

- Crashes QGIS or corrupts data set to No
- Affected QGIS version set to master
- Pull Request or Patch supplied set to No
- Assignee deleted (nobody -)

For the sake of completeness:

In 1.8, libqgis\_core and libqgis\_analysis do so.
