

## QGIS Application - Bug report #2870

### mapserverexportplugin: qgis segfault when plugin used with unsaved project

2010-07-06 12:21 PM - Richard Duivenvoorde

<b>Status:</b> Closed	
<b>Priority:</b> Low	
<b>Assignee:</b> Borys Jurgiel	
<b>Category:</b> Python plugins	
<b>Affected QGIS version:</b>	<b>Regression?:</b> No
<b>Operating System:</b> Debian	<b>Easy fix?:</b> No
<b>Pull Request or Patch supplied:</b>	<b>Resolution:</b> fixed
<b>Crashes QGIS or corrupts data:</b>	<b>Copied to github as #:</b> 12930
<b>Description</b>	
Build Qgis Trunk on Ubuntu 9.10	
When just opening a shp-file in qgis or a postgis layer, and immediatly open de mapserverexportdialog and try to export the project, qgis will first tell you that you should save the project. Doing that causes a qgis segfault on my machine.	
Don't know what the best way to dive into this, but I tried to run qgis with strace to maybe have a clue. Last part attached, but I cannot see something in it.	

#### History

**#1 - 2010-10-23 01:25 AM - Paolo Cavallini**

Duplicated in #2966

**#2 - 2010-10-26 01:03 PM - Richard Duivenvoorde**

- Resolution set to fixed

- Status changed from Open to Closed

fixed by code from Martin in commit:752bad8d (SVN r14435)

see mail thread: <http://lists.osgeo.org/pipermail/qgis-developer/2010-October/011341.html>
