

QGIS Application - Bug report #2900

Distorted raster layer in map composer

2010-07-22 06:34 AM - zicke -

Status: Closed	
Priority: Low	
Assignee: Marco Hugentobler	
Category:	
Affected QGIS version:	Regression?: No
Operating System: RedHat	Easy fix?: No
Pull Request or Patch supplied:	Resolution: fixed
Crashes QGIS or corrupts data:	Copied to github as #: 12960

Description

Raster layers are distorted (wrong scaled?) in the map composer. At the southern and eastern edge there is some unfilled space left and you can see the covered vector layers.

If the raster map has some coordinate grid you can see some difference between the grid from QGIS and the raster grid (getting bigger towards east and south).

History

#1 - 2010-08-02 01:46 AM - Marco Hugentobler

- Resolution set to fixed

- Status changed from Open to Closed

This is a rounding problem and should be fixed in . Please test and feel free to reopen if it isn't
