| The standalone installer doesn't contain `psycopg2` (and `pyqwt5`). The `OSGeo4W` repository does.

`psycopg2` can be downloaded here (for standalone installer)

What's wrong with the `OSGeo4W` repository? <http://download.osgeo.org/osgeo4w/release/python/psycopg2/psycopg2-2.0.6-1.tar.bz2>

nothing, just pointed that the package can be found in different places. I also forgot that now the standalone installer is based on `osgeo4w` packages.
