

## QGIS Application - Bug report #2928

### WFS-T field type are wrong

2010-08-04 01:31 AM - Luca Casagrande

<b>Status:</b> Closed	
<b>Priority:</b> Low	
<b>Assignee:</b> Marco Hugentobler	
<b>Category:</b> Web Services clients/WMS	
<b>Affected QGIS version:</b>	<b>Regression?:</b> No
<b>Operating System:</b> Debian	<b>Easy fix?:</b> No
<b>Pull Request or Patch supplied:</b>	<b>Resolution:</b> fixed
<b>Crashes QGIS or corrupts data:</b>	<b>Copied to github as #:</b> 12988
<b>Description</b>	
<ul style="list-style-type: none"><li>- Add this server: <a href="http://141.250.122.31:8080/geoserver/wfs">http://141.250.122.31:8080/geoserver/wfs</a></li><li>- Load streams layer and start the editing mode</li><li>- Draw a new feature and press right click to stop editing</li><li>- In the attribute insert window, QGis says that the attribute fields are txt</li></ul>	
If I add txt [[GeoServer]] raises an exception, with numeric all is fine.	
Thx Luca	

### History

#### #1 - 2010-08-04 07:46 AM - Marco Hugentobler

- Resolution set to fixed
- Status changed from Open to Closed

This is fixed in commit:32648f6e (SVN r14007). Unfortunately, there is no QLongValidator, so attribute editing with large numbers could be a problem with QIntValidator
