## Description

If map with curved labels is printed, intervals between chars is too small.

Steps to reproduce:

1) create any linear vector layer;

2) add some features with non-NULL text attributes;

3) go to Layer->Labeling, enable new labelng for this layer, select curved placement;

4) add print composer, add map, export map to pdf;

5) labels will be almost unreadable in PDF file.
