

QGIS Application - Bug report #2945

QGIS 1.5 Fails to start on Windows XP Service Pack 2

2010-08-17 01:52 AM - sandramf -

Status:	Closed	
Priority:	Low	
Assignee:	Jürgen Fischer	
Category:	Build/Install	
Affected QGIS version:		Regression?: No
Operating System:	Windows	Easy fix?: No
Pull Request or Patch supplied:		Resolution: fixed
Crashes QGIS or corrupts data:		Copied to github as #: 13005
Description		
<p>I Downloaded the lastest Windows version of QGIS from the web this morning (QGIS-OSGeo4W-1.5.0-14095-Setup.exe), uninstalled, re-installed and restarted but I continue to get the following error:</p> <p>The application failed to initialize properly (0xc000007b). Click OK to terminate the application.</p> <p>I am thinking it may have something to do with the fact that I also have Visual Basic 2008 Express Edition loaded? I have already tried to install VC Redist Runtimes to rectify this error but nothing has worked thus far.</p> <p>I would appreciate some advice.</p> <p>Thank you</p>		

History

#1 - 2010-08-17 02:03 AM - sandramf -

Additional Info - I also have [[MapWindows]] GIS (MapWinGIS) installed along with the [[MapWinGIS]] ActiveX Control referenced as a COM Component to extend the spatial capabilities of VB 2008.

#2 - 2010-08-18 05:56 AM - sandramf -

- Resolution set to fixed
- Status changed from Open to Closed

Problem solved by renaming PROJ.dll and libtiff.dll files in the C:/Windows/System32 folder to PROJ_preQgis.dll and libtiff_preQgis.dll respectively (see <http://trac.osgeo.org/qgis/ticket/2919>).

Thank you

Sandra
