### Description

I wrote a patch that creates a second pdf file: It's A3 sized and contains only the map and the residuals. Like the report pdf you can choose if you want to create it.

I applied also some cosmetic changes:

- red and thinner residuals

- set the decimal places of the source raster control points to zero (subpixel doesn't make sense to me?)

Feel free to comment and criticize.

Reassigning to Marco since he was the main developer of georeferencer.

As zicke suggests a patch, I'm changing the type to patch...
