

## QGIS Application - Feature request #2953

### Missing layers not picked up in a folder where another missing layer is located

2010-08-19 02:33 AM - infobleep -

<b>Status:</b> Closed	
<b>Priority:</b> Low	
<b>Assignee:</b> nobody -	
<b>Category:</b> Project Loading/Saving	
<b>Pull Request or Patch supplied:</b>	<b>Resolution:</b> fixed
<b>Easy fix?:</b> No	<b>Copied to github as #:</b> 13013
<b>Description</b>	
<p>Sometimes layers may change folders. When this happens each layer has to be located. It would be extremely helpfull though if when locating one layer in a folder, all other layers in that folder were also located. This would save anything to do each layer seperatly.</p>	

#### History

---

##### #1 - 2011-04-19 01:34 PM - Jürgen Fischer

- Resolution set to fixed
- Status changed from Open to Closed

bad layers are now handled in a list (see commit:c2e94506 (SVN r15354))
