

# QGIS Application - Bug report #2966

## QGIS crashes when in Mapserver Export

2010-08-24 01:12 AM - richwhite -

<b>Status:</b> Closed	
<b>Priority:</b> Low	
<b>Assignee:</b> Borys Jurgiel	
<b>Category:</b> Python plugins	
<b>Affected QGIS version:</b>	<b>Regression?:</b> No
<b>Operating System:</b> Windows	<b>Easy fix?:</b> No
<b>Pull Request or Patch supplied:</b>	<b>Resolution:</b> duplicate
<b>Crashes QGIS or corrupts data:</b>	<b>Copied to github as #:</b> 13026
<b>Description</b>	
<p>When using [[MapServer]] Export, a project needs to be created.</p> <p>If the project isn't already created when the [[MapServer]] plugin is started, it prompts the user to save the current project. When the project location and name are chosen and Ok is clicked, QGIS reports a problem and informs the user that it needs to close.</p> <p>This occurs regardless of the data source, shapefile, postgis database etc.</p> <p>This doesn't occur if the project is saved before using the [[MapServer]] Export plugin.</p>
