

QGIS Application - Bug report #2995

segfault using Style Manager

2010-09-12 05:30 PM - Giuseppe Sucameli

Status: Closed	
Priority: Low	
Assignee: nobody -	
Category: Symbology	
Affected QGIS version:	Regression?: No
Operating System: Debian	Easy fix?: No
Pull Request or Patch supplied:	Resolution: fixed
Crashes QGIS or corrupts data:	Copied to github as #: 13055

Description

First I choose Edit -> Style Manager...

If I press the "+" button the terminal displays the following messages:

```
Warning: QColor::setNamedColor: Unknown color name 'character_n'  
Debug: couldn't create image from "pastedpic_10102008_233747.png"  
Debug: couldn't create image from "pastedpic_10102008_233747.png"  
Debug: couldn't create image from "pastedpic_10102008_233747.png"  
Debug: couldn't create image from "pastedpic_10102008_233747.png"  
Debug: couldn't create image from "pastedpic_10102008_233747.png"  
Warning: QColor::setNamedColor: Unknown color name 'character_n'  
Debug: couldn't create image from "pastedpic_10102008_233747.png"  
Debug: couldn't create image from "pastedpic_10102008_233747.png"  
Debug: couldn't create image from "pastedpic_10102008_233747.png"  
Debug: couldn't create image from "pastedpic_10102008_233747.png"  
Debug: couldn't create image from "pastedpic_10102008_233747.png"
```

Then the "Simbol properties" dialog was displayed only after 5-6 secs (sometimes the GUI freezes).

In the Simbol properties dialog I get a segfault or core-dumped in a lot of cases (sometimes some of these work fine):

1. removing the marker by click on "-" button and then changing the symbol
2. removing the marker and adding a new one, then changing the symbol
3. adding a new marker, then removing it and changing the symbol

The problem seems to be that there are no markers selected when I select the new symbol.

History

#1 - 2010-10-30 03:05 AM - Martin Dobias

Can you please test again? I think the problems have been fixed some time ago.

#2 - 2010-11-04 02:42 AM - Giuseppe Sucameli

Using commit:ada0e13f (SVN r14490):

1. No more GUI freeze, the "Symbol Properties" dialog is displayed next I click on the button.

2. More stable, very few segfaults. I get it only adding (+) a new marker, removing (-) a marker (no markers become selected) then changing the symbol.

#3 - 2010-11-12 03:26 AM - Martin Dobias

- *Resolution set to fixed*

- *Status changed from Open to Closed*

Last problem fixed in commit:06305bc4 (SVN r14554).
