Easy fix?: No	Copied to github as #: 13059
Description	
<p>Hello,</p> <p>Some files in the project have unnecessary unistd.h include, which causes them not to compile under msvc.</p> <p>Another issue on Windows, iconv package from [[GnuWin]]32 is named libiconv.lib, so [[FindIconv]].cmake doesn't find it.</p> <p>Both issues are handled in the attached patch (tested also on linux, it doesn't break anything)</p>
