QGIS Application - Bug report #3018
Found a bug in Save Layer as KML

2010-09-17 03:44 PM - compasscorp -

Status:	Closed			
Priority:	Low			
Assignee:	nobody -			
Category:	Data Provider			
Affected QGIS version:		**Regression?:**	No	
Operating System:	Windows	**Easy fix?:**	No	
Pull Request or Patch supplied:		**Resolution:**	worksforme	
Crashes QGIS or corrupts data:		**Copied to github as #:**	13078	

Description

I am trying to export layer to KML but it's total messed up.

Value of one field appears in another, some values not saved at all.

I have screen shot of it.

History

#1 - 2010-09-19 06:53 AM - Paolo Cavallini

Similar thing here: only two fields are exported, but they are empty. Debian unstable, self compiled.

#2 - 2010-09-19 08:20 AM - Jürgen Fischer

#2933 and http://lists.osgeo.org/pipermail/gdal-dev/2010-August/025800.html ff

#3 - 2011-03-03 05:41 AM - Anne Ghisla

For me the KML export is working fine, I tested several shapefiles, with > 15 columns in attribute table.

Self compiled on Fedora 14, QGIS Trunk commit:44441dec (SVN r15305).

#4 - 2011-03-03 05:44 AM - Paolo Cavallini

Therefore, closing it. Please reopen if necessary

#5 - 2011-03-03 05:44 AM - Paolo Cavallini

- *Resolution set to worksforme*

- *Status changed from Open to Closed*
