| **Affected QGIS version:** | | | **Regression?:** | No |
| **Operating System:** | Debian | | **Easy fix?:** | No |
| **Pull Request or Patch supplied:** | | | **Resolution:** | invalid |
| **Crashes QGIS or corrupts data:** | | | **Copied to github as #:** | 13089 |

**Description**

I select vector Properties/Query Builder
and use the mouse to create a Query which
results on error at executing the query.
The same procedure works fine with the Query Builder
started from the Attribute Table.

Also, other users confirm that this problem is
not present under Windows

Please see the attachments
