

QGIS Application - Feature request #3041

Make the GdalTools command window editable

2010-09-23 04:25 PM - Giuseppe Sucameli

Status:	Closed	
Priority:	Low	
Assignee:	Giuseppe Sucameli	
Category:	GDAL Tools	
Pull Request or Patch supplied:	No	Resolution: fixed
Easy fix?:	No	Copied to github as #: 13101
Description		
<p>Perhaps a way to increase the flexibility not having to follow the many request of the kind "why don't you add this option?" would be having the current text window where the command is written as an editable window, where the user could add options for which there is no tab in the menu.</p> <p>I know we can now just cut and paste into an editor, edit there and run the edited command, but if this editing could be done directly in the Raster tools window, that would enhance operationality.</p>

- Pull Request or Patch supplied set to No
- Operating System deleted (Debian)
- Target version deleted (Version 1.7.0)

It seems to have understand that one major problem would be maintain the GUI in sync with the command windows. From a user point of view I would not mind to loose the sync (maybe after a warning pop-up) if favour of having the command window editable.

#4 - 2011-10-05 02:44 PM - Nathan Woodrow

no popups please, they are a pain in the butt. I think just disabling all the controls would be the better way to go. You might also need to add a reset button so that the user can reset the string back to what the controls had set.

#5 - 2011-10-05 03:55 PM - Alister Hood

It seems to have understand that one major problem would be maintain the GUI in sync with the command windows.

If it is too complicated to allow the user to manually edit the whole command, there could simply be a line edit widget for typing "additional options".

Another thought: If it was possible to manually edit the command, the "Creation options" feature could probably be removed (if the users know what to insert as a creation option it is probably safe to assume they know to type -co to add creation options).

#6 - 2011-10-05 10:26 PM - Paolo Cavallini

IMO it is better to move the plugin to the new analytical infrastructure, so making major changes to the existing plugin is essentially a waste of time

#7 - 2011-10-06 04:44 PM - Giuseppe Sucameli

- Resolution set to fixed
- Status changed from Open to Closed

Without the sync this ticket became a minor enhancement. Done in commit dd6a594178d6d480ff9585fde12fb7987c81e2d1
