

QGIS Application - Bug report #3062

change in r.reclass & GRASS plugin location browser

2010-09-28 11:50 AM - Giovanni Manghi

Status:	Closed	
Priority:	Low	
Assignee:		
Category:	GRASS	
Affected QGIS version:	master	Regression?: No
Operating System:	All	Easy fix?: No
Pull Request or Patch supplied:	No	Resolution: invalid
Crashes QGIS or corrupts data:	No	Copied to github as #: 13122
Description		
<p>It seems that the r.reclass command has changed. Now it doesn't produce anymore a output map but just save a "reclass table"</p> <p>http://grass.fbk.eu/gdp/html_grass64/r.reclass.html</p> <p>this means that the base map cannot be deleted with g.remove unless forcing the operation (-f).</p> <p>In fact the GRASS shell will return something like</p> <pre>GRASS_INFO_WARNING(4733,1): [DTM@curso_manha] is a base map. Remove reclassified map first: exposicao_reclass@curso_manha</pre> <p>when trying to delete a base map in the GRASS plugin browser, the warning is not caught and no message is given to the user.</p>

Replying to [lutra](#):

It seems that the r.reclass command has changed. Now it doesn't produce anymore a output map but just save a "reclass table"

http://grass.fbk.eu/gdp/html_grass64/r.reclass.html

Nothing has changed. It's been always this way.

this means that the base map cannot be deleted with g.remove unless forcing the operation (-f).

In fact the GRASS shell will return something like

```
> GRASS_INFO_WARNING(4733,1): [DTM@curso_manha] is a base map. Remove reclassified map first:
> exposicao_reclass@curso_manha
```

when trying to delete a base map in the GRASS plugin browser, the warning is not caught and no message is given to the user.

But does it remove the base map?
