QGIS Application - Bug report #3074
Can't classify categorized for line layer with a query

2010-10-01 07:15 AM - lapson -

Status:	Closed		
Priority:	Low		
Assignee:	Martin Dobias		
Category:	Symbology		
Affected QGIS version:		**Regression?:**	No
Operating System:	Windows	**Easy fix?:**	No
Pull Request or Patch supplied:		**Resolution:**	worksforme
Crashes QGIS or corrupts data:		**Copied to github as #:**	13134

Description

Take a line feature, add a query to the layer. Then go to symbology, choose "Categorized" renderer, and click "Classify" button.

The list should populate with all of the values of the selected field that are in the layer, but instead NOTHING HAPPENS.

History

#1 - 2010-11-13 12:50 PM - Volker Fröhlich

- Resolution set to worksforme

- Status changed from Open to Closed

Seems OK in Trunk.

Please re-open and give more details, if problem continues to exist.
