QGIS Application - Bug report #3107
Color Scale Bar does not find the colour table or QML file

2010-10-12 09:15 AM - alobo -

Status:	Closed		
Priority:	Low		
Assignee:	Borys Jurgiel		
Category:	Python plugins		
Affected QGIS version:		**Regression?:**	No
Operating System:	Debian	**Easy fix?:**	No
Pull Request or Patch supplied:		**Resolution:**	invalid
Crashes QGIS or corrupts data:		**Copied to github as #:**	13167

Description

1. It seems that the plugin requires a *.tbl or *.qml file for the "Open a colour table or QML file" dialog, yet the file created by
"1-band raster colour table" is a *.txt file
2. If you select the file created by "1-band raster clour table", a second dialog prompts for the file again. If you cancel this second dialog
the file initially selected appears in the general Dialog of the plugin, but when you click
"Create" an error message is displayed: "You have to first select file".
3. Same behaviour for *.qml files
