History

#1 - 2010-10-13 01:54 PM - Jürgen Fischer

- Resolution set to fixed
- Status changed from Open to Closed

fixed in commit:1684936b (SVN r14378).

#2 - 2010-10-14 01:08 AM - Paolo Cavallini

- Status changed from Closed to Feedback
- Resolution deleted (fixed)

It still happens in commit:12a404a6 (SVN r14379) (possibly less often than before)

#3 - 2010-10-14 04:15 AM - Andreas Neumann

same for me - the bug still exists on Windows OSGeo build commit:12a404a6 (SVN r14379).

On Ubuntu Lucid 64bit, the problem doesn't appear. Strange ...

It seems to have reappeared. If I switch cache off it is ok, when on the problem is still there.

With caching OFF: load a layer, then a second one; switch off and on the top layer, ok; switch off and on the bottom layer, it remains on the canvas. It is more of an annoyance than a serious problem.
