

QGIS Application - Bug report #3114

Digitizing issue whith attribute updates when "Avoid intersection" and "shared editing" is active

2010-10-15 04:48 AM - Andreas Neumann

Status:	Closed	
Priority:	Low	
Assignee:	nobody -	
Category:	Digitising	
Affected QGIS version:		Regression?: No
Operating System:	All	Easy fix?: No
Pull Request or Patch supplied:		Resolution: fixed
Crashes QGIS or corrupts data:		Copied to github as #: 13174
Description		
<p>It appears that if</p> <ul style="list-style-type: none"><li>- shared (topological) editing and</li><li>- avoid intersection is active in a polygon layer</li></ul> <p>and the user creates two adjacent new polygons next to existing polygons, that one of the previously digitized features may accidentally inherit attributes from the feature just digitized.</p>		

History

#1 - 2010-10-28 02:17 PM - Marco Hugentobler

- Resolution set to fixed
- Status changed from Open to Closed

commit:fb48cc0c (SVN r14445) should fix this. Please test and reopen if not.

#2 - 2010-11-01 01:04 AM - Andreas Neumann

I can confirm that this bug is now fixed - thank you!
